# 5th Energy Conservation Plan Meeting Notes

Wednesday, June 13, 2018 -- Red Lodge Area Community Foundation

## Agenda

4:00 Welcome

4:05 Go over the Presentation Version of our Strategies

- Kathryn went over the presentation version of each Strategy and the group gave comments and made edits

5:10 Discuss Public Works Committee Meeting

- June 26th, 4:00 to 5:00 pm we will present to Public Works
- How can we best present this in a brief manner that doesn't take 4 hours?
- Decided we should send out a packet to the PW Committee members beforehand including an introductory letter, each strategy, and the survey results
- Will pull up each Strategy and ask for each one if there are any questions or concerns we can address, it will be imperative that the PW Committee members read and digest the packet ahead of time
- Give an intro at the start that explains the intent of this plan, energy and cost savings, increasing the liveability and sustainability of Red Lodge, etc.
- Present each focus area for 10 or 12 minutes and fielding questions
- I will be at the front of the room presenting, members of the group will be there to support, field questions, and hold discussion
- Are we just gathering input, is there anything else we want to ask of Public Works at this point? Should we ask PW to bring this before Council?

5:40 Go over the Community Survey Results

- Currently had 164 responses, got pretty positive responses on lots of the questions
- Only 48 people left write-in comments, some of them were very aggressive and worried about money
- We are still hoping to get 200 responses, but that is relatively ambitious
- Down the line, maybe we or the Mayor should write a letter to the editor addressing the concerns brought up in the Survey

6:00 Wrap-Up

## Next Meeting -- July

Set our Reduction Target Goal(s)

Establish a Plan for Monitoring & Reporting
